

As part of the Virginia Megaprojects program, two spot improvements in the Tysons Corner area are scheduled for construction. These improvements include extending the right turn lane along Leesburg Pike (Route 7) east near the Gallows Road (Route 650) intersection and extending the left turn lane from Gallows Road north onto Old Courthouse Road. These improvements will allow motorists earlier access to the turn lanes providing safer intersections.

Paving work for these spot improvements will occur from **August 12 through August 13**, weather permitting. Crews will close the right lane on Route 7 east at Gallows Road and the left lane on Gallows Road north at Old Courthouse starting at **10:30 p.m. Friday night, reopening by 7 p.m. Saturday**. All businesses will remain open and accessible. However, please use caution in the work zone as some entrances may be blocked over the weekend.

These spot improvements are necessary to improve traffic flow around these intersections and allow motorists earlier access the turn lanes.
